INTRODUCTION

- **This is console based mini banking application system, which has been design in Java Technology. In this application we are trying to make some basic functionality for end user. There are some basic operations that user can perform on their account.**

OBJECTIVES

- **General purpose of over application is to provide bank related basic activity to end user. Customers can check their balance, They can also withdraw and deposit the money in their bank account though software without the need of going personally to a Bank. This app gives user the facility to work in one's own comfort and at a time convenience for them. It is user friendly application.**

ADVANTAGES

- This Application provides some basic functionality for the end user. There are some basic operations that users can perform on their account like open account ,check account details and perform transactions.
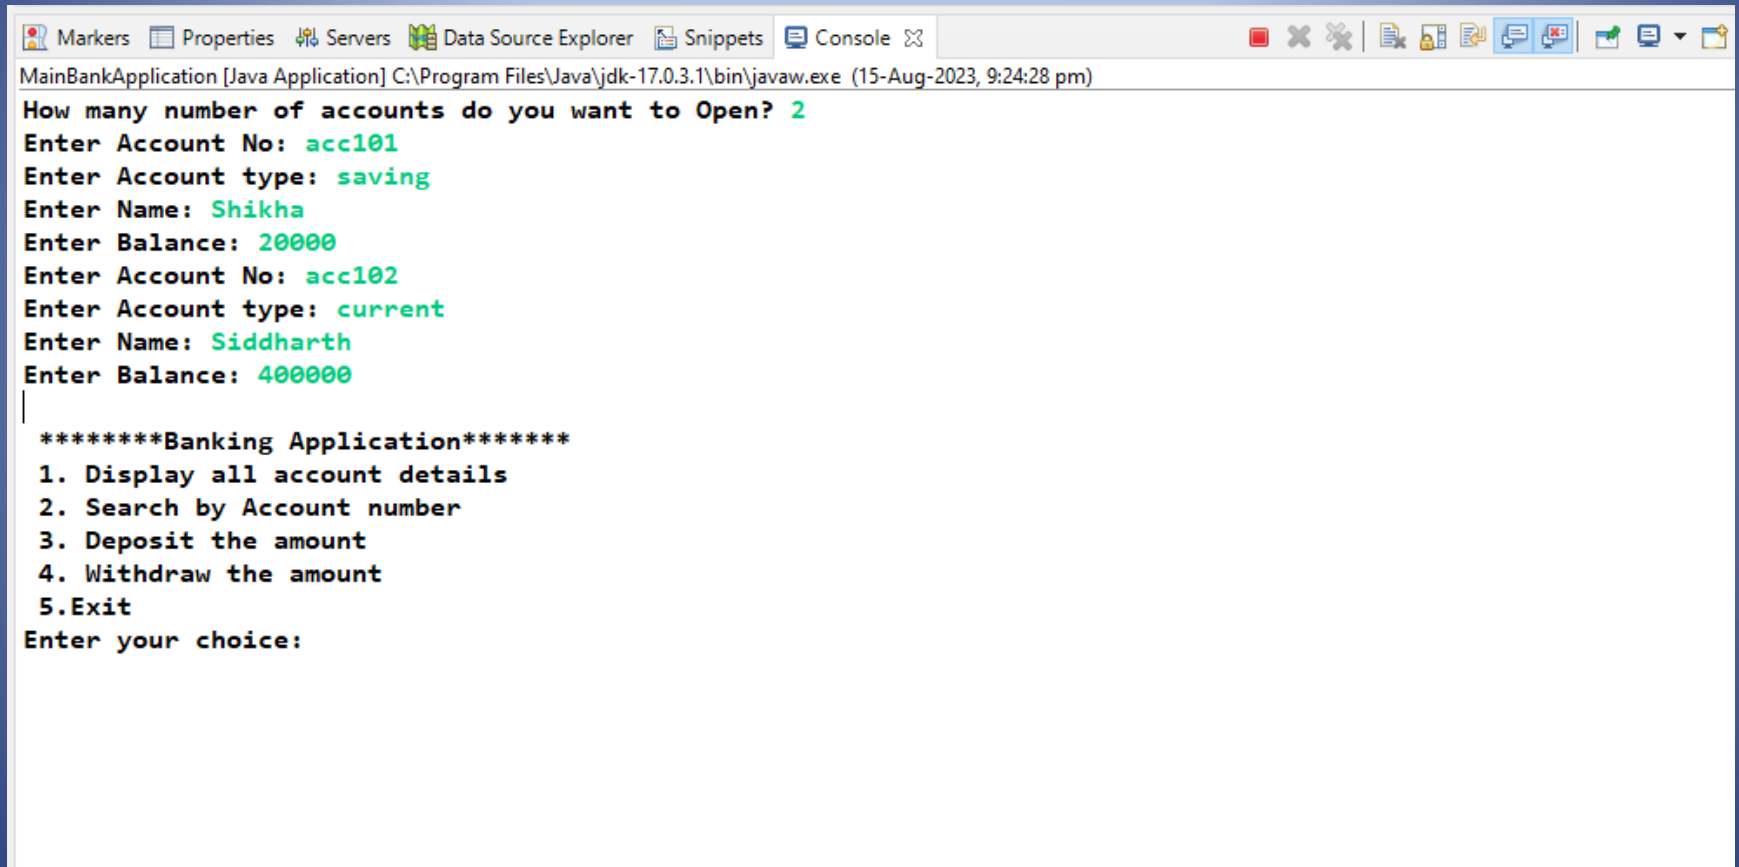

WORKING

There are some basic operations that users can perform on their account.

Operations:

   1. User can open own account in bank
